

PRECISION CUTTING TOOLS, INC.

# ENDMILLS

## HIGH-PERFORMANCE MILLING-ALUMINUM APPLICATIONS

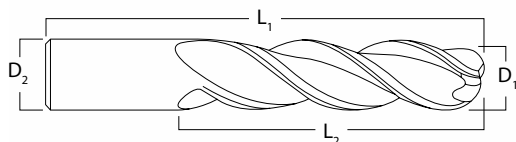

Now Improved with  
**EDGE CUT™**

### 360 SERIES

**3 Flute - Variable Endmill, Eccentric OD**  
High-Performance Milling - Aluminum Applications

The 360 Series is engineered for improved chip evacuation and maximum metal removal rates. Its design consists of an eccentric OD, standard chamfer, large gullet and a 1° radial land. The 360 Series is ideal for increased metal removal rates and minimal chatter.

**CARBIDE**  
CARBURO

**3**  
Flutes

**Exxtral Carbon®**

**Exxtral Carbon® coating** is ideal for machining of Aluminum and Non-Ferrous Metals.

#### Benefits:

- Increased metal removal rates
- Increased depth-of-cut
- Improved accuracy
- Chatter-free machining
- Higher speeds & feeds
- Superior surface finish on the part

#### Applications:

- Aluminum
- ...and its alloys

- 1. Standard Chamfer**  
Corner radii (Available upon request)
- 2. 3 Flute Variable**  
Left-hand (Available upon request)
- 3. Large Gullet**  
Improved chip evacuation
- 4. Eccentric OD**  
For a tougher cutting edge
- 5. 1° Radial Land**  
Reduced chatter
- 6. Exxtral Carbon® Coating**  
Reduces friction between the chip & tool
- 7. Extended Neck**  
Available for deep-pocket applications

Proudly Manufactured in the  
**United States of America**
