

PRECISION CUTTING TOOLS, INC.

ENDMILLS

HIGH-PERFORMANCE MILLING

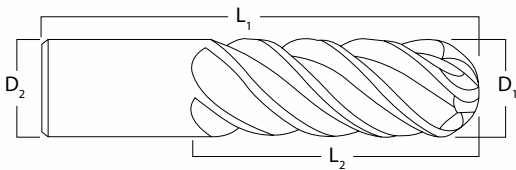

Now Improved with
EDGE CUT™

558 SERIES

5 Flute - Variable Endmill, Eccentric OD
High-Performance Milling

The 558 Series is engineered to eliminate harmful harmonics at the point of contact, producing a smoother finish. Its design consists of an eccentric OD, asymmetrical flutes and a 35° helix; a design ideal for increased metal removal rates and cutting depth.

35°

Silver-Exx®

Silver-Exx® is ideal for machining abrasive and gummy materials.

- 1. Sharp Corner**
Chamfer / Corner radii
(Available upon request)
- 2. 5 Flute Variable**
Left-hand (Available upon request)
- 3. Eccentric OD**
For a tougher cutting edge
- 4. Silver-Exx® Coating**
High speed operations, semi-dry or dry machining.
- 5. Extended Neck**
Available for deep-pocket applications

Benefits:

- Increased metal removal rates
- Increased depth-of-cut
- Improved accuracy
- Chatter-free machining
- Higher speeds & feeds
- Superior surface finish on the part

Applications:

- Stainless Steels
- Titanium
- Cast Iron
- Inconel
- ...and their alloys

Proudly Manufactured in the
United States of America
