ENDMILLS

MULTI-FLUTE COBALT FINISHER

COBALT M42

2-8 Flute Finishing Endmills

Our (2-8 Flute) Cobalt Finishing Endmills are designed for general purpose applications including Steels, Cast Materials and Heat-Resistant Alloys. Their geometry includes a 35° helix and Exxtral Plus® coating; features ideal for increased metal removal rates and a smooth finish on the part.

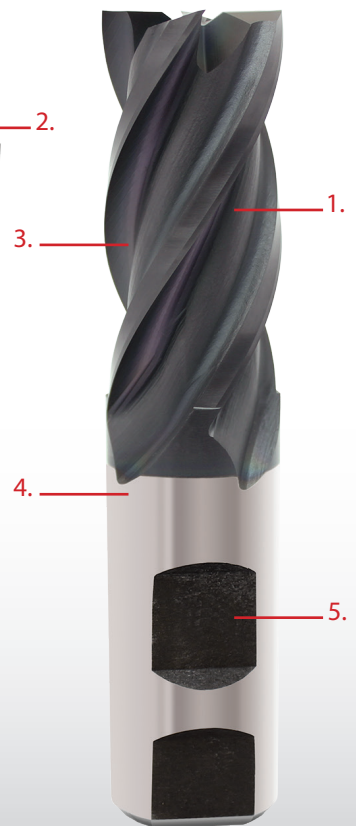

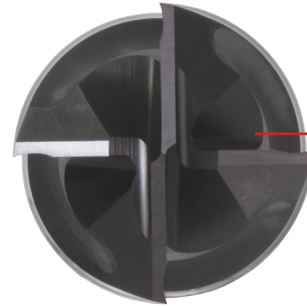

Cobalt (M42)

2, 4, 6, 8 Flutes

35°

Exxtral Plus®

Exxtral Plus® is ideal for high-performance machining of hard materials.

- 1. **35° Helix**
Improved chip evacuation
- 2. **2-8 Flutes**
Left-Hand available
- 3. **Exxtral Plus® Coating**
High-speed operations, semi-dry or dry machining (available upon request)
- 4. **Extended Neck**
(Available upon request)
- 5. **Weldon Flats**
Reduced Slippage

Benefits:

- Increased metal removal rates
- Reduced slippage
- Higher speeds & feeds
- Longer tool life

Applications:

- Steels
- Cast Materials
- Heat-Resistant Alloys
- ...and their alloys

Proudly Manufactured in the
United States of America
